Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's representative requested interview to discuss proposed amendments to the pending claims. In particular, Applicant's representative discussed features of Applicant's invention that were believed to distinguish over the applied prior art. Specifically, Applicant discussed how workflow engine did more processing than taught by the prior art and how the patient was the one who made the choice to order a prescription. The Examiner suggested that Applicant use claim language to specify such features and will re-consider rejections in light of Applicant's response and/or amendment. However, any amendment requiring further search an/or consideration will NOT be entered.
